THE PITCH IN 30 SECONDS

How it works

tenseconds.ai

(615) 307-6603

You are not selling AI. You are selling: stop losing the leads you already paid for.

1

They reach out

A customer calls or lands on the website at 9pm. The AI picks up instantly — in your voice, with your services.

2

It qualifies them

It asks what they need, where they are, and how urgent it is. No form. No hold music. No lost lead.

3

Your phone buzzes

Name, number, and the whole conversation land as a text on your phone while they are still deciding.

What every customer gets

- AI answers calls, texts, and website chat 24/7
- Instant text alert on every new lead
- A CRM with every contact and message logged
- Your own cloned voice — customers hear you
- Follow-up sequences built for your industry
- We build it and set it all up. You do nothing.

One missed call costs more than a month of this.

Founders pricing — first 25 businesses, locked for 12 months. No contract.

The opener

"If somebody calls you tonight at 8 and you don't pick up — what happens to that job?"

"I already have a receptionist / I answer my own phone."

Great — this is for the calls you cannot get to. Nights, weekends, when you are under a truck or with a client. It never replaces you, it catches what falls.

"I don't do computers."

You don't need one. Everything comes to you as a text message. Reply YES to confirm, CHANGE to move it. That's the whole system.

"I already pay for leads."

That's the problem. You're renting the same lead as three competitors. This turns your own callers into your own leads — you own them forever.

"How fast can I have it?"

Set up in a few days. You give us your services and 25 seconds of your voice. We do the rest.

"What if it says something wrong?"

It only knows what we teach it — your services, your hours, your prices. Every conversation is logged so you can read it back.

"What does it really cost me?"

\$129 to set up, \$49 a month. One missed job pays for the year.
